Education

Maharaja Agrasen Institute Of Technology	**Nov 2021 - June 2025**
Bachelor of Technology in Computer Science with specialization in AI and ML; CGPA: 9.052	*New Delhi, India*
Amity International School	**Nov 2019 - May 2021**
Intermediate CBSE Board; Percentage: 90.2	*Delhi, India*

Technical Skills

Languages: C++, Ruby, Python, C, Bash, SQL, JavaScript
Tools: NodeJS, Docker, Kubernetes, Build Tools(rake), CI/CD, Terraform, MRSK, Prometheus, Opentelemetry, Helm
Frameworks: Rails, Flask, Gatsby, Hugo
Platforms: Git, AWS, Heroku, GCP
Databases: PostgreSQL, MySQL, Redis, MongoDB, Cloud Databases

Experience

CircuitVerse **Oct 2022 - Present**
Core Team Member *remote*
- Diligently maintaining and routinely reviewing **infrastructure** for CircuitVerse.
- Proficiently authored **Helm Charts** for CircuitVerse.org.
- Ensured **100% code coverage** through RSpec unit tests while delivering detailed documentation, automation scripts and blog posts.

Google Summer of Code'23 @CircuitVerse.org **May 2023 - Sep 2023**
Student Developer *remote*
- Successfully made the application **12-factor compatible**, significantly improving its efficiency and scalability.
- Efficiently migrated nearly **1 million user attachments** (e.g., avatars, Circuit images from the server) from a deprecated tool to AWS S3.
- Implemented Opentelemetry **distributed tracing** via gRPC and HTTP protocols, enhancing observability, and exported telemetry data to 2 backends - Jaeger and New Relic.
- Introduced **Monit tool for server monitoring** and automatic repairs, ensuring 100% system stability and reduced critical failures.
- Created a **zero downtime deployment pipeline** using GitHub Actions and kamal.
- Dropped visitor tracking by adopting **HyperLogLog** for efficient project view count.

GirlScript Summer of Code **Feb 2022 - May 2022**
Contributor *remote*
- Ranked **137** among 2000+ contributors, actively contributed to web projects, specializing in JavaScript, React, and NodeJS, while assisting peers.

Projects

Innate | *Rails, JavaScript, PostgreSQL, Redis, StimulusJS*
- Built a **multi-tenant** SaaS English Learning Platform with a 3-tier architecture, utilizing Docker volumes for production deployment.
- Leveraged **Redis and StimulusJS** to enhance user experience and data handling.

HandWriting Recognition WebApp | *Machine Learning, Flask, AWS, Helm, Kubernetes, arm64, CI/CD*
- Created a Flask web app, hosted on AWS EC2 and **integrated CNN and RNNs** with the YOLO-based HTR model.
- Trained the HTR model on **34,000 images** with 6.5k unique words, achieving **91.93% accuracy**.
- Crafted a GitHub Actions workflow **to build and push a Docker image to a registry**, along with **Helm charts** for simplified Kubernetes deployment.

npx vaibhav-up | *JavaScript, NodeJS, JSON*
- An NPM package that serves as a resume in CLI with **500+ downloads**. Deployed the package and automated the build process using CI/CD.

Extracurricular/Awards

- Mentored participants at **FOSS HACK'23** for CircuitVerse.org.
- Curate and maintain a **private homelab** powered by Mac Mini M2 as a server.
- Active Member of CircuitVerse, GDSC MAIT and Intelgenics MAIT
- Earned 15 skill Badges in Google Cloud Practitioner program.
